

BioCrossroads[®] LIN_X

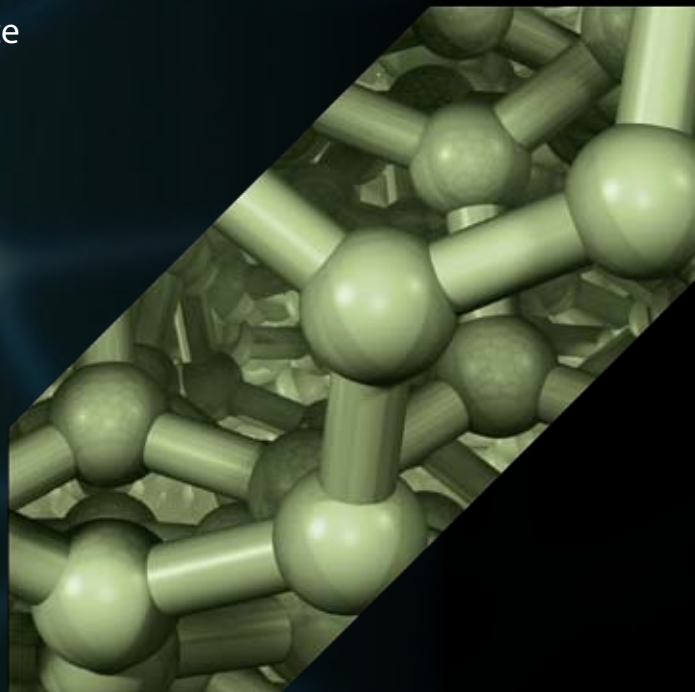

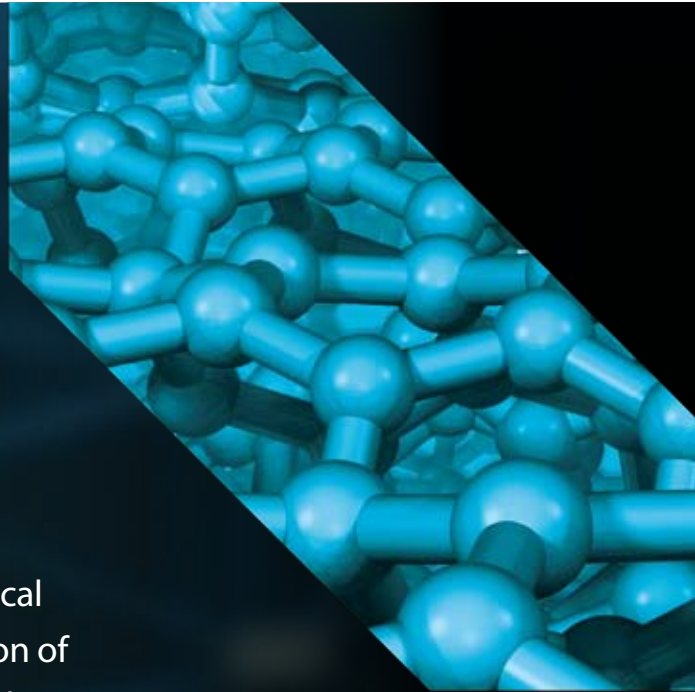

we make discovery

bring your discovery to life

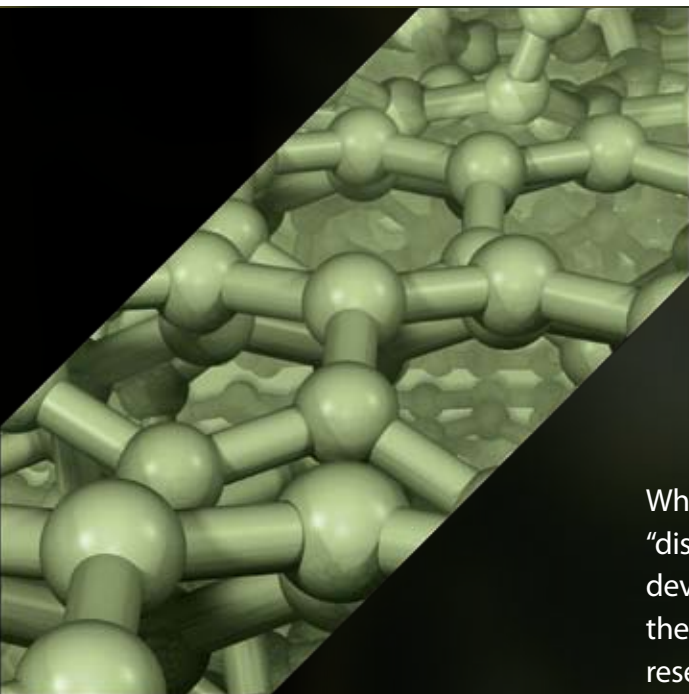

Indiana is well-positioned to support pharmaceutical and biotechnology companies with its concentration of nearly 50 contract drug development service providers. From toxicology studies and pre-clinical services to formulation and manufacturing, more than 8,000 skilled workers help companies and universities to advance discovery and develop drugs around the world.

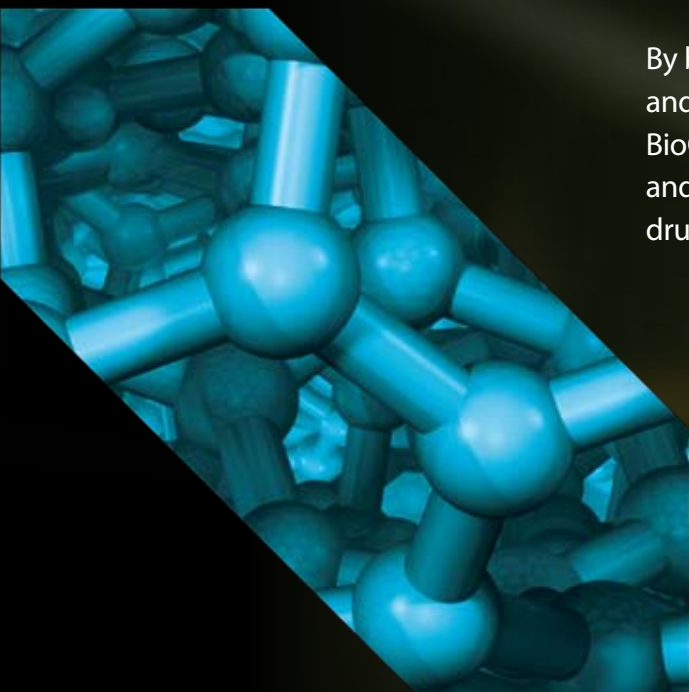

discovery development delivery

where discovery happens

While biotechnology research is primarily concentrated in several "discovery" centers on the coasts, Indiana has a broad set of development capabilities that meet the needs for everyone from the largest pharmaceutical and biotech companies to the single researcher. Indiana's companies provide more than 120 specialized services to biopharma companies worldwide.

By building regional collaborations and developing educational programs, BioCrossroadsLINX is connecting discovery and development. Indiana is at the center of drug development. **We make discovery.**
